II SEMESTER END EXAMINATION: MAY 2022

PROGRAMMING FOR PROBLEM SOLVING

Time: 3 Hrs.

Max. Marks: 70

INSTRUCTIONS

Attempt all questions. Every question carries equal marks.

- Q.1. a) Write the structure of C program. 7
- b) Write a program to perform arithmetic operations using switch case. 7

OR

- a) Write a note on C Tokens. 7
- b) Write a note on control statements used in C. 7
- Q.2. a) Explain the different types of user defined functions. 7
- b) Write a program to calculate the factorial and the sum of factorial using functions. 7

of first n natural numbers.

a) What is pointer? Give its syntax and example. Write program to print the sum of three numbers using pointers.

b) Explain function declaration, function definition and function call, in detail with examples.

Q.3. a) Write a program to add two matrixes/matrices and display the resultant matrix.

b) Give the declaration and the definition syntax for 1D and 2D array.

data name [5]
OR
[5]

a) Write a program to insert an element in 1D array.

b) What is an array to pointer and pointer to pointer

(double pointer)?

11 → = { 1, 1, 3 }

Q.4. a) Explain the different string handling functions.

b) What is a character array? Write its declaration and definition with examples.

1234 = { '1', '2', '3', '4' }

Explain the concept of array of strings.

7

Explain strlen(), strrev(), strcmp() and strcpy() with syntax and examples.

7

struct name

Give the syntax of declaration and definition of

- 7

structure with examples.

Write a program to input details of books and display

7

the same details, using ~~union~~ structure.

OR

object;

a) What is file handling? Explain the different operations

7

that can be performed on a file.

b) Write a program to read the details of students by

7

passing structure variable to function.

for(

do {

{ printf("%d", c[i][5])
